

TAIWAN EXCELLENCE

Where Quality Meets Innovation

Infocomm USA 2025, booth no : 7161

Organized by

International Trade Administration

Taiwan External Trade Development Council

TAIWAN EXCELLENCE

Taiwan Excellence Award, rigorously selected by the government, recognizes top Taiwanese brands for sustainability, design, R&D, quality, and marketing. It symbolizes innovation and fosters international collaboration by showcasing Taiwan's commitment to working with global partners.

i-Ctrl Pro

i-Ctrl Pro turns your home into a smart home: Easy to set up and user-friendly, it enables smart control for all traditional devices with unlimited remote control range from your smartphone to your house using 3G/4G internet.

i-Ctrl AC (AIFA Smart AC remote)

i-Ctrl AC, the central hub of IoT smart home products, allows you to manage your home remotely via WiFi and Infrared technology. It provides a complete smart home ecosystem by connecting and turning the legacy home appliances to smart appliances.

AVC01 AIFA Smart Voice Control box

AVC01 AIFA Smart Voice Controller turns your home into a smart home. No need of internet connection, the plug and play design enables user to voice control TV, AC, Set Top Box, Fan, Ceiling Light, vacuum easily and conveniently.

Akasa

Akasa provides thermal solutions for computer hardware and electronics, fusing innovative design with cutting-edge technology and engineering to deliver exceptional products for our customers. Founded in 1997, Akasa has extensive expertise in delivering quality cooling solutions tailored to meet diverse customer needs, including passive and active case solutions, coolers, heatsinks, fans and thermal interface material. As a trusted platform solution provider, we partner with customers across the entire product development cycle, supporting embedded systems, audiovisual technology, digital signage and more. Our services include industrial design, prototyping, mechanical and thermal analysis, system integration and scalable volume production. We specialize in delivering OEM, ODM and standardized thermal solutions. Complementing our superb design engineering is our network of ecosystem partners for motherboards, daughter boards, network interface cards (NICs) and other PCBAs. This ensures our products match the complex demands of the latest computer processor and board form-factor technologies. With offices in the UK, the Netherlands, Taiwan and Brazil, and manufacturing facilities in China, we offer seamless integration of systems with our thermal solutions, enabling us to support both prototyping and large-scale production efficiently. Our commitment to uncompromising quality is backed by the use of premium-grade materials and rigorous quality control standards.

Plato RC A-NUC106-M1B

A low-profile fanless case for ASUS NUC 14 Pro (28W TDP) with aluminum cooling for silent operation. Supports four 4K displays, VESA-mounting and 2.5" SSD. Features extended USB connectivity alongside standard motherboard I/O. Ideal for digital signage and security applications.

Galileo TU1 Plus MKII

A-ITX52-M1BV2

A 1U rack-mountable fanless case for Thin Mini-ITX motherboards (35W TDP) with Intel® LGA1851 sockets. Aluminum chassis with copper heatpipes ensures silent cooling. Supports four 2.5" drives, PCIe (x4), USB connectivity and VESA-mounting. Ideal for server, broadcasting and pro-AV applications.

Laplace K12

A-STX15-M1B

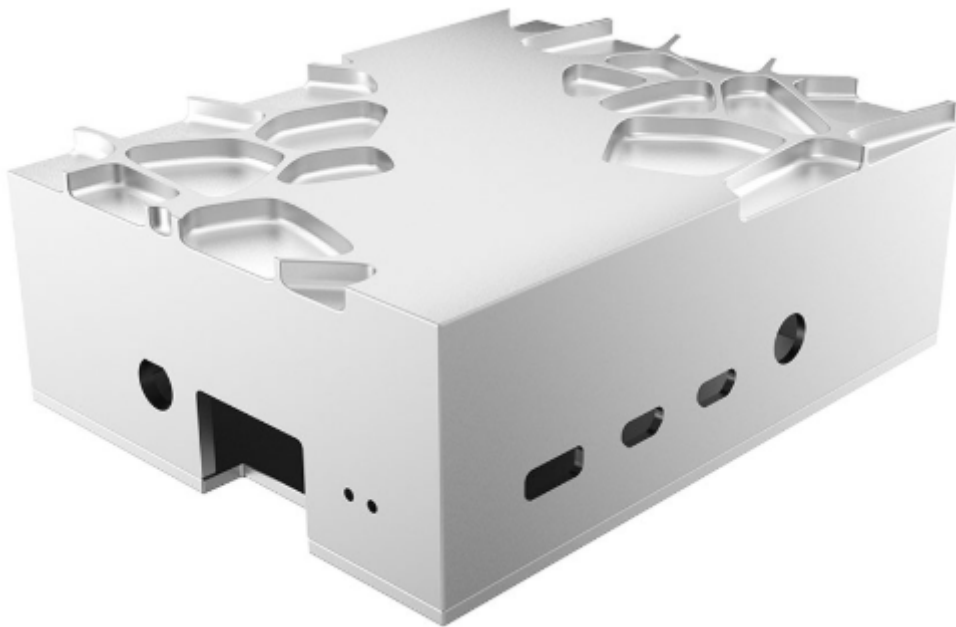

A 1U fanless Mini-STX case for Kontron K3921 boards (10W TDP) with aluminum cooling for silent operation. Supports VESA-mounting, LAN, USB and DisplayPort, with optional rackmount front panel configurations. Ideal for pro-AV, server, and industrial applications.

Gem Pro A-RA09-M2S

A stylish, gem-like aluminum case for Raspberry Pi 4 with passive cooling and full I/O access. Includes customized thermal kit for effective heat dissipation. Supports dual displays and offers durable protection. Ideal for media players, IoT and smart home applications.

Turing RC Pro

A-NUC101-M1B

A contemporary fanless aluminum case for ASUS NUC 14 Pro (40W TDP) with copper heatpipes and SSD thermal kit for silent cooling. Supports up to four 4K displays, full I/O access and VESA-mounting. Ideal for digital signage and security applications.

AVer

Founded in 2008, AVer focuses on innovation in the Pro AV, education, telemedicine, and video conferencing fields. The company provides solutions which have received prestigious domestic and international awards. In addition to offering customers an intuitive and interactive collaboration experience, AVer upholds an environmentally friendly philosophy, actively fulfilling its corporate value of sustainable development.

miniLED Transparent Display Demo Case

The static visual display of objects can be transformed into a dynamic scene and interactive atmosphere, and can also be designed into intelligent installation art with penetrating visual effects.

43" High-brightness Information Display

The 48:9 aspect ratio of the long screen is different from the general 16:9 design and is more suitable for various information push application displays, such as retail, advertising, transportation, instant messaging, etc.; or for use in special shapes and irregular space.

27" 3D Gaming Display

INX 27" N3D Eyetracking adopts the world's unique N3D display technology and its low-crosstalk algorithm delivers a high-quality 3D visual experience, greatly ameliorating the pain point of dizziness caused by long-term use. The exclusive algorithm renders 3D in real time without taking up computational resources. Its excellent display technology brings e-sports players marvelous 3D visual enjoyment as if they were transported to their favorite scenes.

AI+ Inno-Gallery Display

This display is different from traditional displays in the past. It has the visual comfort of eye protection, greatly improves the viewing quality, and can provide high-quality image display. Besides, the AI creative art function can make the digital art display a creative platform through which artists can realize their creativity and ideas and transform them into real works of art. This personalized use experience not only improves user satisfaction, but also enriches their artistic enjoyment.

InWin

Founded in 1985, InWin is an ISO 9001-certified manufacturer of professional computer and server chassis, power supplies, cooling systems, and system assembly solutions. Renowned for high-quality enclosures that meet all safety regulations, as well as unsurpassed customer service.
